Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The disclosure is objected to because of the following informalities:

The Brief Description of the Drawings is missing the respective figure references.

Appropriate correction is required.

Claim Objections

Claim 13 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. It appears original claim 1 was amended to include the limitations of original claim 13 in a preliminary amendment, but claim 13 remains pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "the main body" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites "it" in line 2. The noun to which the pronoun refers is indefinite.

All of claim 2-17 depend from claim 1 and are therefore indefinite themselves.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-5 and 13-17, as far as they are definite, are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent Application Publication No. 2002/0001522 A1 (Mukherjee et al. hereinafter).

Mukherjee et al. show a compressor wheel for a turbocharger in FIG. 1, wherein the hub 16 is made from aluminum (paragraph 0016, lines 13-15). Fibers such as metal and polymer in a matrix form are alternatively the material of choice (paragraph 0016, lines 15-20). Regarding Applicants' species embodiment of FIG. 5 and claims 1 and 3-5, the Mukherjee et al. wheel comprises a reinforcing structure 22 located at the nave of the wheel which is pre-stressed such as by shrinking (see paragraph 0016) to impart a compressive stress in the impeller to oppose the centrifugal stress imposed on the rotating wheel (see paragraph 0014).

Allowable Subject Matter

Claims 2 and 6-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
